TESTIMONIALS.

From the Rev. J. D. Frost, A.B., Minister of St. Paul's, Winchmore Hill.

Winchmore Hill, October 23rd, 1849.

DEAR SIR,—After one winter's experience of your stove in St. Paul's Chapel, I feel no hesitation in saying that it may fairly claim a place in the first rank, among the inventions for warming churches. Before adopting your stove, I made extensive inquiries, both as to the different kinds of stoves in use, and also as to the best-water system. In every instance of one kind or other I found practically experienced under the various systems which I witnessed; but I simply have not one instance, reference or objection to allege against your stove. I believe it to be more powerful than any other stove of the same dimensions and expense; and it is far more agreeable in a church than any other with which I am acquainted.—I remain, dear Sir, yours truly,

J. D. FROST.

From the Rev. Dr. VIVIAN, Minor Canon of St. Paul's, and Rector of St. Peter-le-Poer, Old Broad-street.

SIR,—I have no hesitation in bearing testimony to the excellence of your stoves; in producing an equal degree of warmth over the whole of a large building, and in promoting ventilation. I consider them unrivalled. They are also the most economical I have ever met with. My church, which was notoriously one of the coldest in the metropolis, has, since the introduction of your stove (one of the largest size), about twelve months ago, become perfectly warm and comfortable.

I am, Sir, your faithful and much obliged servant,

J. W. VIVIAN, D.D.

THE STOVE MAY BE SEEN IN OPERATION AT THE MANUFACTORY, AT KING'S COLLEGE (WHERE SEVERAL HAVE BEEN FIXED), AND AT MESSRS. HITCHCOCK AND ROGERS'S, ST. PAUL'S CHURCHYARD.

JORDAN'S PATENT MACHINE CARVING and MOULDING WORKS for WOOD and STONE, Belvidere-road, Lambeth, and 124, Strand.—WILLIAM WILLIAMS and JORDAN beg to call the attention of the building community to a new feature of their establishment, and at the same time to thank their numerous patrons and friends for the very liberal support they have already experienced, which they assure them and the public, it will be their greatest endeavour to deserve, by giving their customers an increased share of the advantages arising from the constant improvements in the machinery which they have just succeeded in applying to the production of the most intricate carving in Casts and other freestones, and in stationary mouldings.

T. W. and J. particularly solicit the attention of architects and builders to the fact that, by the use of this machinery, a very large saving, both of time and money, is effected,—so great, indeed, that in many cases they can deliver a well-finished article in Casts stone for less money than it can be obtained in common wood, while their wood-carving will, in some cases, be found to come into close competition with the best kinds of composition ornament.—For prices and estimates apply at 124, Strand.

TESTIMONIAL FROM CHARLES BARRY, ESQ.

"Westminster, May 16th, 1848.

"Gentlemen,—In reply to your letter requesting my opinion of your revised Carving Machinery, I have much pleasure in stating from an experience of more than two years, in its application to the production of the wood carvings of the House of Peers, and other appointments of the New Palace at Westminster, that I am enabled to make the most favourable report concerning it, and to add that it has gone on more than justifying the favourable terms in which I recommended it in 1845 to her Majesty's Commissioners of Woods and Works for adoption.—I remain, Gentlemen, yours faithfully,

"CHARLES BARRY."

Messrs. Taylor, Williams, and Jordan."
